

FOR AN OUT OF THIS
WORLD
EXPERIENCE
 09 624 1246 / stardome.org.nz

From ancient civilisations to current space exploration, humankind is always learning more about the universe we live in. Join us as we share our passion and experience with your students here at Stardome Observatory and Planetarium.

Each visit includes a feature show inside the Planetarium and a classroom style session led by our education team. You can choose from topics including the solar system, history of astronomy, space exploration, ancient Egyptian astronomy, deep space and more! We are a LEOTC provider, and our shows are in line with the NZ science curriculum, plus can be easily integrated with other subjects such as maths, geography, history and technology. We are always happy to customise a programme specifically for your group.

Personalising Learning in a Digital World
