

GENERATION ISLAND

Generation Island is an interactive website - created especially for Year 7 and 8 students and their teachers. It supports the Technology, Science, Social Studies, and English curriculum documents.

Generation Island does your work for you. It includes:

- a fun animated interactive game that challenges kids to power electricity island and see what impact their choices have on the environment
- a values exploration and social decision making section that lets kids know about the pluses and minuses of different power generation options and asks for their opinions
- electricity conservation tips for students
- a gallery where you can publish your kids' work on the website
- a comprehensive unit plan with specific lessons including learning outcomes, learning experience, and assessment rubrics.
